

A collection of overlapping, semi-transparent blue and teal geometric shapes, primarily triangles and polygons, arranged in a dynamic, layered fashion. Below these, there are several smaller, irregular shapes with a dark, textured, rust-like appearance.

quality for **rain gutters**

ELVAL COLOUR IS A COATED ALUMINIUM PRODUCER

With access to all steps of the manufacturing process, ability to provide custom defined shades and address any formability requirements. We provide coated aluminium coils and strips that meet the most demanding requirements for colour shade durability and ease of formability in accordance with customer requirements and European Norms.

ELVAL COLOUR is certified according to:
ISO 9001:2008 - ISO 14001:2001

YDORAL®

RAIN GUTTERS MADE OF COATED ALUMINIUM

Aluminium is a soft, lightweight but strong material; its weight is about one third to that of steel or copper; it is malleable, ductile and it can be easily formed; it has excellent corrosion resistance and durability. Furthermore it is not magnetic, it makes no sparks, it has high thermal and electrical conductivity, it's non-toxic, and fully recyclable.

The comparative advantages of aluminium rain gutters are mainly lower weight, better formability, colour retention and lower cost. These are the reasons why the pre-painted aluminum is the perfect solution for rain gutters production. Pre-painted aluminum used for gutters, tubes, accessories and hooks can match natural looking finishes offered by much more expensive materials such as Zinc and Copper.

YDORAL® is the brand name for ELVAL COLOUR's wide range of pre-painted aluminium material, specialized for the manufacturing of gutters and it's accessories.

YDORAL®

quality for rain gutters

ELVAL COLOUR, thanks to its experience and its technology, is able to offer coatings of high quality standards suitable for every application and process.

Our products are positioned at the very High-End of the market while maintaining a competitive price.

For any further information you can contact our Technical Team that will reply to your questions in a professional and knowledgeable way. We can also provide you with samples of gutters, tubes and accessories produced with our material, for your personal evaluation.
